Product Summary

Product Description

Vine Antennas AS-HF-OCF-80 | Off Centre Fed Dipole

A traditional Dipole is a half-wavelength radiator, fed in the Centre with two equal length legs, the Off-Centre-Fed Dipole is a Dipole whose feedpoint is at a point removed from the centre of the antenna. A traditional dipole is fed in the centre with 50-ohm coax, or more correctly through a 1:1 balun, whereas the off-centre fed dipole is fed through a 4:1 balun. **Specification]** Bands:

40M, 20M, 15M, 10M (without ATU)

30M, 17M, 12M (with ATU)

Power: 200W Max

Overall Length 127'

Overall Length 38.7096m
